

KCEPS

Approach to Calculation

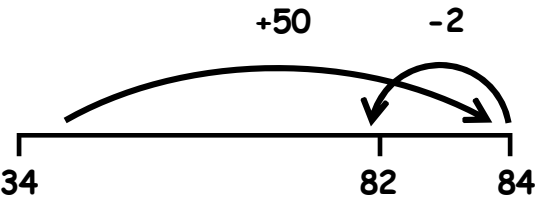

Name _____,

The purpose of this document is to outline the stages of progression for written calculation methods for the four number operations. Written methods of calculation are based on mental strategies, for example number bonds to 10, 20 and 100 and quick recall of times tables and associated divisions.

Each of the strategies within this document have been organised in order and it is really important to take into account the levels in which children are working so that each child has a sound understanding of the mathematics and not just a mechanical method for finding an answer. When a new strategy is introduced previous stages may need to be revisited to consolidate understanding. A sound understanding of place value and the number system is essential for children to carry out calculations efficiently and accurately.

All children should have, at their level, a reliable method for the four operations which they understand and *can explain*.

| | | | | |
|--|--|--|---|---|
| <p><u>Near doubles</u></p> | <p>8 + 9 = 17 is the same as 1 more than double 8 ($16 + 1 = 17$) or 1 less than double 9 ($18 - 1 = 17$)</p> <p>37 + 36 = 73 is the same as 1 more than double 36 ($72 + 1 = 73$) or 1 less than double 37 ($74 - 1 = 73$)</p> | | | |
| <p><u>Near Multiple of 10 and adjust</u></p> <p>This is a good mental strategy</p> | <p>34 + 48 = 82 is the same as 34 add 50 and subtract 2</p>  <p>64 + 71 = 135 is the same as 64 plus 70 plus 1 more</p> | | | |
| <p><u>Partitioning</u> TU + TU Mental strategy with jottings</p> | <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; vertical-align: top;"> <p>86 + 37 = 123</p> <p style="margin-left: 20px;">86 + 37 = 123</p> <p style="margin-left: 20px;">(80+30) + (6+7)</p> <p style="margin-left: 20px;">110 + 13 = 123</p> </td> <td style="width: 50%; vertical-align: top; text-align: right;"> <p>or</p> <p style="margin-left: 20px;">80 + 6</p> <hr style="width: 50%; margin-left: 20px;"/> <p style="margin-left: 20px;">30 + 7</p> <hr style="width: 50%; margin-left: 20px;"/> <p style="margin-left: 20px;">110 + 13 = 123</p> </td> </tr> </table> | <p>86 + 37 = 123</p> <p style="margin-left: 20px;">86 + 37 = 123</p> <p style="margin-left: 20px;">(80+30) + (6+7)</p> <p style="margin-left: 20px;">110 + 13 = 123</p> | <p>or</p> <p style="margin-left: 20px;">80 + 6</p> <hr style="width: 50%; margin-left: 20px;"/> <p style="margin-left: 20px;">30 + 7</p> <hr style="width: 50%; margin-left: 20px;"/> <p style="margin-left: 20px;">110 + 13 = 123</p> | |
| <p>86 + 37 = 123</p> <p style="margin-left: 20px;">86 + 37 = 123</p> <p style="margin-left: 20px;">(80+30) + (6+7)</p> <p style="margin-left: 20px;">110 + 13 = 123</p> | <p>or</p> <p style="margin-left: 20px;">80 + 6</p> <hr style="width: 50%; margin-left: 20px;"/> <p style="margin-left: 20px;">30 + 7</p> <hr style="width: 50%; margin-left: 20px;"/> <p style="margin-left: 20px;">110 + 13 = 123</p> | | | |
| <p><u>Expanded Column method.</u> Add the <u>units</u> first.</p> <p>You should be able to explain clearly what you are doing with understanding of place value.</p> | <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; text-align: right; vertical-align: top;"> $\begin{array}{r} 47 \\ + 76 \\ \hline 13 \\ \hline 110 \\ \hline 123 \end{array}$ </td> <td style="width: 50%; text-align: right; vertical-align: top;"> $\begin{array}{r} 648 \\ + 286 \\ \hline 14 \\ \hline 120 \\ \hline 800 \\ \hline 934 \end{array}$ </td> </tr> </table> | $\begin{array}{r} 47 \\ + 76 \\ \hline 13 \\ \hline 110 \\ \hline 123 \end{array}$ | $\begin{array}{r} 648 \\ + 286 \\ \hline 14 \\ \hline 120 \\ \hline 800 \\ \hline 934 \end{array}$ | |

| $\begin{array}{r} 47 \\ + 76 \\ \hline 123 \\ \hline 1 \end{array}$ | $\begin{array}{r} 648 \\ + 286 \\ \hline 934 \\ \hline 11 \end{array}$ | $\begin{array}{r} 268.74 \\ 86.046 \\ + 47.8 \\ \hline 402.586 \\ \hline 221 \end{array}$ | | |

Subtraction

| | |
|---|---|
| <p><u>Mental Skills</u></p> <ul style="list-style-type: none"> • Recognise the size and position of numbers • Count back in ones and tens • Subtract multiples of 10 from any number | <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>count back</p> <p>fewer</p> <p>less</p> </div> <div style="text-align: center;"> <p>subtract</p> <p>difference</p> </div> <div style="text-align: center;"> <p>take away</p> <p>minus</p> </div> </div> |
| <p><u>Counting back using a number line</u></p> | <div style="margin-bottom: 20px;"> <p>15 - 7 = 8</p> <p>Or</p> </div> <div> <p>105 - 47 = 58</p> <p>Or</p> <p>Or</p> </div> |
| <p><u>Near multiple of 10 and adjust</u></p> <p>This is a good mental strategy</p> | <p>105 - 47 = 58 same as subtract 50 and then add back 3</p> |

Counting on using a number line or set out vertically

This method can be used with decimals but it becomes less efficient with decimals and bigger numbers

$$74 - 27 = 47$$

Leading to

| | | | |
|------|----|------|----|
| 74 | | 74 | |
| - 27 | | - 27 | |
| 3 | 30 | 3 | 30 |
| 40 | 70 | 44 | 74 |
| 4 | 74 | 47 | |
| 47 | | | |

$$526 - 178 = 348$$

Leading to

| | | |
|-------|-----|--|
| 526 | | |
| - 178 | | |
| 22 | 200 | |
| 300 | 500 | |
| 26 | 526 | |
| 348 | | |

Counting on using a number line or set out vertically

Expanded method leading to column method

The expanded method leads to the more compact method. Only move onto this method once you have secure mental skills and you have a clear understanding of when partitioning numbers is required.

$$74 - 27 = 47$$

| | | | |
|---------------|---|--------------|--|
| 60 | | 14 | |
| 70 | + | 4 | |
| - 20 | + | 7 | |
| 40 | + | 7 | |

| | | | |
|--------------|--|--------------|--|
| 6 | | 14 | |
| 7 | | 4 | |
| - 2 | | 7 | |
| 4 | | 7 | |

Expanded method
leading to column
method

$$741 - 367 = 374$$

$$\begin{array}{r}
 130 \\
 600 \quad \cancel{30} \quad 11 \\
 \cancel{700} + \cancel{40} + \cancel{1} \\
 - 300 + 60 + 7 \\
 \hline
 300 + 70 + 4
 \end{array}$$

$$\begin{array}{r}
 13 \\
 6 \quad \cancel{3} \quad 11 \\
 \cancel{7} \quad \cancel{4} \quad \cancel{1} \\
 - 3 \quad 6 \quad 7 \\
 \hline
 3 \quad 7 \quad 4
 \end{array}$$

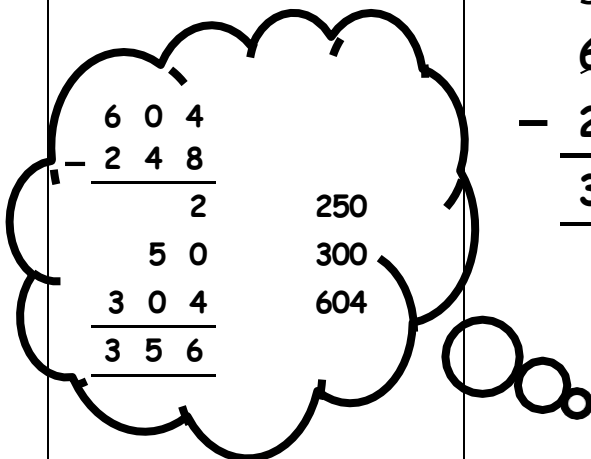

Are you choosing the best strategy for yourself?

Extend column
method to include
zero values

$$604 - 248 = 356$$

$$\begin{array}{r}
 90 \\
 500 \quad \cancel{100} \quad 14 \\
 \cancel{600} + \cancel{0} + \cancel{4} \\
 - 200 + 40 + 8 \\
 \hline
 300 + 50 + 6
 \end{array}$$

$$\begin{array}{r}
 9 \\
 5 \quad \cancel{10} \quad 14 \\
 \cancel{6} \quad \cancel{0} \quad \cancel{4} \\
 - 2 \quad 4 \quad 8 \\
 \hline
 3 \quad 5 \quad 6
 \end{array}$$

Extend column method to include decimals and zero values

Line up the decimal points
Place an extra zero if necessary

$$90.4 - 58.75 = 31.65$$

$$\begin{array}{r}
 \begin{array}{cccc}
 & 9 & & 13 \\
 8 & \cancel{10} & & \cancel{3} & 10 \\
 \cancel{9} & \cancel{0} & . & \cancel{4} & 0 \\
 - & 5 & 8 & . & 7 & 5 \\
 \hline
 & 3 & 1 & . & 6 & 5
 \end{array}
 \end{array}$$

Are you choosing the best strategy for yourself?

Choose the best strategy for yourself?

Think about each question you're doing and decide on the best strategy.

A column method may not always be the most efficient strategy.

What about $90.4 - 58.75$?

Near multiple and adjust?

subtract $60 = 30.4$
add back $1.25 = 31.65$

Count on?

set out vertically

$$\begin{array}{r}
 90.4 \\
 - 58.75 \\
 \hline
 1.25 \quad 60 \\
 30.4 \quad 90.4 \\
 \hline
 31.65
 \end{array}$$

Multiplication

Mental skills

- Count on in different steps
- Double and halve numbers
- Recognise multiplication as repeated addition
- Quick recall of multiplication facts
- Use known facts to derive associated facts
- Multiplying by 10, 100 and 1000
- Estimation
- Multiplying by multiples of 10

| | |
|--------------------------|------------------|
| multiplication | product |
| once | twice |
| double | groups of |
| repeated addition | lots of |
| multiply | array |
| column | times |
| | multiple |

Count in groups and record as arrays

2 groups of 4 = 8

$$2 \times 4 = 8$$

4 groups of 2 = 8

$$4 \times 2 = 8$$

How many groups of 3 can be made from 12?

How many groups of 4 can be made from 12?

Apply times tables and associated facts to groupings

$$3 \times 4 = 12 \quad 12 \div 4 = 3$$

$$4 \times 3 = 12 \quad 12 \div 3 = 4$$

Count on in groups along a number line

$$5 \times 6 = 30$$

Doubling and Halving

By doubling one number and halving the other you will create a question with the same answer.

Useful for finding factors of a number

$5 \times 16 = 80$

$10 \times 8 = 80$

$14 \times 3 = 42$

$7 \times 6 = 42$

$15 \times 8 = 120$

$30 \times 4 = 120$

Factors of 40

$1 \times 40 = 40$

$2 \times 20 = 40$

$4 \times 10 = 40$

$5 \times 8 = 40$

Multiplying by 10 and 100

| Multiplying | Digits Move |
|--------------|---------------|
| $\times 10$ | 1 place LEFT |
| $\times 100$ | 2 places LEFT |

$25 \times 10 = 250$

| Hundred | Ten | Unit |
|---------|-----|------|
| 100 | 10 | 1 |
| | 2 | 5 |
| 2 | 5 | 0 |

$25 \times 100 = 2500$

| Thousand | Hundred | Ten | Unit |
|----------|---------|-----|------|
| 1 000 | 100 | 10 | 1 |
| | | 2 | 5 |
| 2 | 5 | 0 | 0 |

$9.52 \times 10 = 95.2$

| Ten | Unit | | Tenth | Hundredth |
|-----|------|---|-------|-----------|
| 10 | 1 | . | 0.1 | 0.01 |
| | 9 | . | 5 | 2 |
| 9 | 5 | . | 2 | |

$95.2 \times 100 = 9520$

| Thousand | Hundred | Ten | Unit | | Tenth | Hundredth |
|----------|---------|-----|------|---|-------|-----------|
| 1 000 | 100 | 10 | 1 | . | 0.1 | 0.01 |
| | | 9 | 5 | . | 2 | |
| 9 | 5 | 2 | 0 | . | | |

Partition numbers

$34 \times 6 = 204$

$(30 \times 6) + (4 \times 6)$

$180 + 24 = 204$

Grid multiplication

TU \times U

$34 \times 6 = 204$

| | | |
|----------|-----|----|
| \times | 30 | 4 |
| 6 | 180 | 24 |

$180 + 24 = 204$

You can use the same strategy for HTU \times U

Grid multiplication

TU x TU

This is a good strategy but it becomes less efficient when you move onto HTU x TU

76 x 49 = 3724

| | | |
|----|------|-----|
| x | 70 | 6 |
| 40 | 2800 | 240 |

Choose the easiest way to add them up?

9 630 54

| | | | | | | | | |
|---|---|---|---|----|---|---|---|---|
| 3 | 0 | 4 | 0 | or | 3 | 4 | 3 | 0 |
| | 6 | 8 | 4 | | | 2 | 9 | 4 |
| 3 | 7 | 2 | 4 | | 3 | 7 | 2 | 4 |
| | 1 | | | | | 1 | | |

Expanded vertical multiplication

TU x U

TU x TU

You can use the same strategy for

HTU x U

34 x 6 = 204

| | | | |
|---|--------------|--------------|--------------|
| | 3 | 4 | |
| x | | 6 | |
| | 2 | 4 | |
| | 1 | 8 | 0 |
| | 2 | 0 | 4 |
| | 1 | | |

76 x 49 = 3724

| | | | | |
|---|--------------|--------------|--------------|---|
| | | 7 | 6 | |
| x | | 4 | 9 | |
| | | 5 | 4 | |
| | 6 | 3 | 0 | |
| | 2 | 4 | 0 | |
| | 2 | 8 | 0 | 0 |
| | 3 | 7 | 2 | 4 |
| | 1 | 1 | | |

with or without carrying

Compact vertical

multiplication

TU x U & TU x TU

HTU x U & HTU x TU

Partial carrying of digits is expected to be

recorded mentally

| | | | | | | | | | | |
|--|--|--|--|--|--|--|---|---|---|---|
| | | | | | | | 7 | 6 | | |
| | | | | | | | 6 | 8 | 4 | |
| | | | | | | | 3 | 0 | 4 | 0 |
| | | | | | | | 3 | 7 | 2 | 4 |
| | | | | | | | 1 | 1 | | |

$$\begin{array}{r} \times \quad \underline{6} \\ 204 \\ 2 \end{array}$$

$$\begin{array}{r} \times \quad \underline{4} \\ \underline{9} \end{array}$$

Most able pupils extend to

- HTU x TU

Estimation is a key process with all calculations but especially important when working with bigger numbers and decimals.

- Working with decimals

$$274 \times 32 = 8768$$

$$659 \times 78 = 51402$$

Estimate

$$300 \times 30 = 9000$$

Estimate

$$700 \times 80 = 56000$$

$$\begin{array}{r} 274 \\ \times 32 \\ \hline 548 \\ 8220 \\ \hline 8768 \end{array}$$

$$\begin{array}{r} 659 \\ \times 78 \\ \hline 5272 \\ 46130 \\ \hline 51402 \\ 1 \quad 1 \end{array}$$

Decimals

$$3.4 \times 7.5 = 25.58$$

Estimate

$$3 \times 8 = 24$$

Think of equivalent calculation

$$34 \times 75 \div 100$$

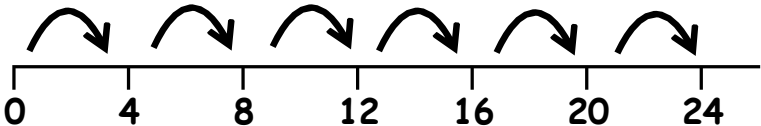

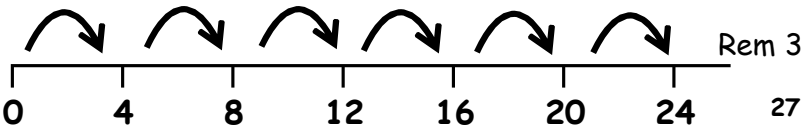

Multiply digits together (ignore decimals)

$$\begin{array}{r} 34 \\ \times 75 \\ \hline 170 \\ 2380 \\ \hline 2558 \\ 1 \end{array}$$

Use estimate and equivalent calculation to decide where to place the decimal point.

$$2558 \div 100 = 25.58$$

Division

| | |
|--|---|
| <p><u>Mental Skills</u></p> <ul style="list-style-type: none"> Count back in different steps Double and halve numbers Recognise division as repeated subtraction Quick recall of division facts Use known facts to derive associated divisions Divide by 10, 100 and 1000 Divide by multiples of 10 | <p>group groups of</p> <p>lots of divide divided by</p> <p>dividend divisor quotient</p> <p>division factor</p> <p>remainder divisible</p> <p>half halve share</p> <p>Key Language $18 \div 3 = 6$</p> <p>18 is the dividend</p> <p>3 is the divisor</p> <p>6 is the quotient</p> |

| <p><u>Use a number line to count on in groups</u></p> | <p>$24 \div 4 = 6$</p>  <p>$27 \div 4 = 6 \text{ rem } 3$</p>  |

Dividing by 10 or 100

| Dividing | Digits Move |
|------------|----------------|
| $\div 10$ | 1 place RIGHT |
| $\div 100$ | 2 places RIGHT |

$$250 \div 10 = 25$$

| Hundred | Ten | Unit |
|---------|-----|------|
| 100 | 10 | 1 |
| 2 | 5 | 0 |
| | 2 | 5 |

$$2500 \div 100 = 25$$

| Thousand | Hundred | Ten | Unit |
|----------|---------|-----|------|
| 1 000 | 100 | 10 | 1 |
| 2 | 5 | 0 | 0 |
| | | 2 | 5 |

$$95.2 \div 10 = 9.52$$

| Ten | Unit | Decimal pt. | $\frac{1}{10}$ | $\frac{1}{100}$ |
|-----|------|-------------|----------------|-----------------|
| 10 | 1 | | 0.1 | 0.01 |
| 9 | 5 | . | 2 | |
| | 9 | . | 5 | 2 |

$$360 \div 100 = 3.6$$

| Hundred | Ten | Unit | | Tenth | Hundredth |
|---------|-----|------|---|-------|-----------|
| 100 | 10 | 1 | . | 0.1 | 0.01 |
| 3 | 6 | 0 | . | | |
| | | 3 | . | 6 | |

Use known multiplication facts to work out associated divisions.

$$24 \div 4 = \underline{6}$$

$$\text{use } 4 \times ? = 24$$

$$35 \div 7 = \underline{5}$$

$$\text{use } 7 \times ? = 35$$

Mental division using partitioning

$$64 \div 4 = 16$$

$$(40 \div 4) + (24 \div 4)$$

$$10 + 6 = 16$$

$$102 \div 3 = 34$$

$$(90 \div 3) + (12 \div 3)$$

$$30 + 4 = 34$$

$$91 \div 7 = 13$$

$$(70 \div 7) + (21 \div 7)$$

$$10 + 3 = 13$$

$$196 \div 6 = 32 \text{ rem } 4$$

$$(180 \div 6) + (12 \div 6)$$

$$30 + 2 = 32 \text{ rem } 4$$

$$= 32 \frac{4}{6} = 32 \frac{2}{3}$$

Chunking Up

$$64 \div 4 = 16$$

$$\begin{array}{r} 10 + 6 = 16 \\ 4 \overline{)40 + 24} \end{array}$$

$$91 \div 7 = 13$$

$$\begin{array}{r} 10 + 3 = 13 \\ 7 \overline{)70 + 21} \end{array}$$

$$102 \div 3 = 34$$

$$\begin{array}{r} 30 + 4 = 34 \\ 3 \overline{)90 + 12} \end{array}$$

This method is based on separating the dividend into multiples of the divisor. Initially children can split up into several chunks but with practice they should look for bigger chunks of the divisor.

$$\begin{array}{r} 10 + 10 + 10 + 4 = 34 \\ 3 \overline{)30 + 30 + 30 + 12} \end{array}$$

$$196 \div 6 = 32 \text{ rem } 4 = 32 \frac{4}{6} = 32 \frac{2}{3}$$

$$\begin{array}{r} 30 + 2 = 32 \text{ rem } 4 \\ 6 \overline{)180 + 12} \end{array}$$

Short Division

$$64 \div 4 = 16$$

$$\begin{array}{r} 1 \ 0 \\ 4 \overline{)6 \ 4} \end{array}$$

$$91 \div 7 = 13$$

$$\begin{array}{r} 1 \ 7 \\ 7 \overline{)9 \ 1} \end{array}$$

$$102 \div 3 = 34$$

$$\begin{array}{r} 3 \ 4 \\ 3 \overline{)1 \ 0 \ 2} \end{array}$$

What to do with remainders. Decimal or fraction?

$$196 \div 6 = 32 \text{ rem } 4$$

$$\begin{array}{r} 3 \ 2 \text{ rem } 4 \\ 6 \overline{)1 \ 9 \ 6} \end{array} = 32 \frac{4}{6} = 32 \frac{2}{3}$$

$$350 \div 8 = 43 \text{ rem } 6$$

$$\begin{array}{r} 4 \ 3 \text{ rem } 6 \\ 8 \overline{)3 \ 5 \ 0} \end{array}$$

$$\begin{array}{r} 4 \ 3 \cdot 7 \ 5 \\ 8 \overline{)3 \ 5 \ 0 \cdot 6 \ 0 \ 4 \ 0} \end{array}$$

$$= 43 \frac{6}{8} = 43 \frac{3}{4}$$

Chunking Down

The key to efficiency with this strategy lies in the estimate that is made before the chunking starts.

e.g for $196 \div 6$

$$6 \times 10 = 60$$

$$6 \times 20 = 120$$

$$6 \times 30 = 180$$

$$6 \times 40 = 240$$

Therefore the answer lies between 30 and 40

This method is based on subtracting multiples of the divisor. Initially children subtract several chunks but with practice they should look for the biggest multiples of the divisor to subtract.

$$102 \div 3 = 34$$

$$\begin{array}{r} 34 \\ 3 \overline{) 102} \\ \underline{90} \\ 12 \\ \underline{12} \\ 0 \end{array} \quad \begin{array}{l} \times 30 \\ \times 4 \end{array}$$

$$196 \div 6 = 32 \text{ rem } 4 = 32 \frac{4}{6} = 32 \frac{2}{3}$$

$$\begin{array}{r} 32 \\ 6 \overline{) 196} \\ \underline{60} \quad \times 10 \\ 136 \\ \underline{60} \quad \times 10 \\ 76 \\ \underline{60} \quad \times 10 \\ 16 \\ \underline{12} \quad \times 2 \\ 4 \end{array} \quad \rightarrow \quad \begin{array}{r} 32 \\ 6 \overline{) 196} \\ \underline{180} \quad \times 30 \\ 16 \\ \underline{12} \quad \times 2 \\ 4 \end{array}$$

Long Division

HTU \div TU

List the times table you're working with to help you get started.

$$560 \div 24 = 23 \text{ rem } 8 = 23 \frac{8}{24} = 23 \frac{1}{3}$$

How many packs of 24 can we make from 560?

Estimate first

$$24 \times 10 = 240$$

$$24 \times 20 = 480$$

$$24 \times 30 = 720$$

so the answer must be between 20 and 30

$$\begin{array}{r} 23 \\ 24 \overline{) 560} \\ \underline{480} \quad \times 20 \\ 80 \\ \underline{72} \quad \times 3 \\ 8 \end{array}$$

| 24 times table | |
|----------------|-----|
| 1 | 24 |
| 2 | 48 |
| 3 | 72 |
| 4 | 96 |
| 5 | 120 |
| 6 | 144 |
| 7 | 168 |
| 8 | 192 |
| 9 | 216 |
| 10 | 240 |
